

NADIM AKHTAR

Software Engineer

Ghaziabad, Uttar Pradesh, India | 747-968-0206 | akhtarnadim794@gmail.com | LinkedIn | GitHub

SUMMARY

Final-year Computer Science student and Full Stack Developer with hands-on experience in the MERN stack (React.js, Node.js, Express.js, MongoDB), building responsive, component-based web applications with secure REST APIs. Co-Founder and Lead Developer of Margdarshan, a volunteer initiative delivering free education counseling to underprivileged students.

EXPERIENCE

Co-Founder & Lead Developer — Margdarshan (Guidance Program), Muzaffarpur, Bihar Jun 2024 – Present

- Co-founded Margdarshan, a volunteer guidance program that counsels students on current education trends, college options, and learning platforms.
- Lead and coordinate an 18-member cross-disciplinary team; partner with an education trust to deliver free counseling and education access to underprivileged students.
- Manage outreach, session scheduling, and volunteer onboarding, keeping the program running with no dedicated budget or paid staff.

Web Developer Intern (Remote) — Bharat Intern Nov 2023 – Dec 2023

- Built responsive, cross-browser web pages using HTML5, CSS3, and JavaScript (ES6+) with reusable UI components.
- Shipped three practice projects — a Money Tracker, a Student Registration Form, and a Blog Website.
- Developed working familiarity with Git/GitHub version control and component-based front-end architecture.

PROJECTS

TechPrep — Job-Readiness Platform for IT Careers — MERN Stack 2024

- Built a full-stack platform to help students prepare for IT jobs, with dedicated DSA practice, aptitude tests, coding challenges, and mock interview modules.
- Implemented progress tracking, role-based access, and course/practice management using React.js, Node.js, Express.js, and MongoDB.
- Designed RESTful APIs with JWT authentication and integrated an LLM-based doubt-solving assistant and auto quiz generator.

NikeStore — Nike-Inspired E-Commerce Platform — MERN Stack, Razorpay 2024

- Built a full e-commerce flow — product catalog, cart, wishlist, Razorpay checkout, and an admin dashboard.
- Added an AI-based product recommendation engine and an 'Ask Nike' chatbot for product discovery.
